

How to Strengthen Your Network After the DZS Transition

Ensure Your Network's Stability –

Reliable Alternatives Available Now

With DZS recently announcing plans to shut down operations, a lot of operators are now figuring out their next move. If your network depends on DZS equipment, you're definitely not alone — and the good news is, Winncom is here to help you navigate what's next with confidence.

FIBRAIN and Winncom Technologies, in partnership with DASAN Korea and HALNY Networks, are ready to support your seamless transition. With deep expertise in GPON and XGS interoperability, we deliver future-proof, open-network solutions to ensure uninterrupted service and long-term network stability.

Open Network Solutions

Key Benefits:

Continued Firmware Support
Direct from DASAN Korea, ensuring reliability

Seamless Transition
Compatible solutions for easy migration from DZS equipment

Enhanced Performance & Security
Latest updates and security patches included

Immediate Availability for the U.S. Market
No supply chain disruptions

What This Means for You?

- ✓ **DASAN Korea, a key technology provider to DZS, remains fully operational.**
- ✓ **This is the perfect time to transition to open ONTs for greater flexibility.**
- ✓ **GPON & XGS-PON COMBO OLTs from DASAN Korea's V-Series and V1-Series are readily available.**

ACT NOW

to avoid Service Disruptions!

If your network depends on DZS solutions, now is the time to switch before support is permanently discontinued.

Our experts are ready to assist with guidance, competitive pricing, and seamless alternatives.
